

## CHARM AGE

---

Complex of yeast products rich in polysaccharides and antioxidant compounds to optimize the ageing process using the Charmat method (closed tank)

### CHARACTERISTICS

---

**CHARM AGE** is a complex of yeast products rich in antioxidant compounds specifically developed for sparkling wines, particularly those produced using the Charmat method (closed tank).

The selected yeast by-products contained in **CHARM AGE**:

- Strengthen the antioxidant potential of wines
- Protect the aromatic compounds that are sensitive to oxidation (thiols, terpenes)
- Delay the early ageing of wines
- Enhance volume in the mouth.

### OENOLOGICAL PROPERTIES

---

- Binds quinones that lead to oxidation and oxidative evolution of color in wines.
- Binds free radicals that lead to oxidation.
- Release mannoproteins to enhance wine volume.

### APPLICATION FIELD

---

- **CHARM AGE** is an ageing product to be added to base wines during the preparation of the tirage or when filling the tank where second fermentation will take place.

### APPLICATION RATES

---

Recommended application rate: add 10 to 20 g/hL to base wine.  
Maximum application rate according to current European regulations: 40 g/hL.

### INSTRUCTIONS FOR USE

---

Dissolve **CHARM AGE** in ten times its weight of wine (maximum).  
Add to volume to be treated. Ensure proper homogenization.

### Precautions for use:

Product for enological and food industry applications.  
Use according to current regulations.

### INGREDIENTS

---

Yeast products rich in polysaccharides and antioxidant compounds.

## PACKAGING

---

1 kg bag - Box of 15 x 1 kg.

## STORAGE

---

Store unopened package away from light in a dry and odorless area.

Opened package: use quickly.

Use before best before date (BIUB) stamped on package
